

Site Location Options

Site option 1

Site option 1 sits on top of the existing storage unit, adjacent to the boundary to the North East of the site. This location, although would require demolition of the storage unit, has a very minimal impact on the vegetation and tree bank that bounds the North of the Site.

Site Location Options

Site option 2

Site option 2 again is placed on top of the existing storage unit, adjacent to the boundary to the North East of the site. This location, would require demolition of the storage unit, and would require some additional tree removal works to the North. The benefit of this option is that it has lesser impact on the playing area.
